Instructions

This page shows current, high risk, long and short opportunities in the APC Signals table. Before you make an investment, it's important to wait until the security moves in the direction that you expect for at least one tick or two. And since these are high risk recommendations, be sure not to invest any money that you cant lose. Notice that for almost every index or security listed in this table, a 3X leveraged ETF can be found, which can be used to accelerate earnings.

APC Signals			
	Long Opportunity Based on McGuffin.		Short Opportunity Based on McGuffin.
	Starting up cycle with no McGuffin.		Starting down cycle with no McGuffin.
